

Intelligent Document Processing (IDP) Playbook

Service Optimization Technologies (SOT)

Market Report – September 2019: Complimentary Abstract / Table of Contents

Our research offerings for global services

| | |
|--|--------------------------------------|
| ▶ Market Vista™ Global services tracking across functions, sourcing models, locations, and service providers – industry tracking reports also available | |
| ▶ Application Services | ▶ Human Resources |
| ▶ BPS Banking & Financial Services | ▶ ITS Banking & Financial Services |
| ▶ BPS Healthcare & Life Sciences | ▶ ITS Healthcare |
| ▶ BPS Insurance | ▶ ITS Insurance |
| ▶ Catalyst™ | ▶ IT Services Executive Insights™ |
| ▶ Cloud & Infrastructure | ▶ ITS Life Sciences |
| ▶ Customer Experience Management Services | ▶ Locations Insider™ |
| ▶ Data & Analytics | ▶ PricePoint™ |
| ▶ Digital Services | ▶ Procurement |
| ▶ Engineering Services | ▶ Recruitment & Talent Acquisition |
| ▶ Enterprise Platform Services | ▶ Service Optimization Technologies |
| ▶ Finance & Accounting | |

Membership information

- This report is included in the following research program(s)
 - [Service Optimization Technologies](#)
- If you want to learn whether your organization has a membership agreement or request information on pricing and membership options, please contact us at info@everestgrp.com, unitedkingdom@everestgrp.com, or india@everestgrp.com

More about membership

In addition to a suite of published research, a membership may include

- Accelerators™
- Analyst access
- Data cuts
- Pinnacle Model™ reports
- PriceBook
- Virtual Roundtables
- Workshops

Custom research capabilities

- Benchmarking | Pricing, delivery model, skill portfolio
- Peer analysis | Scope, sourcing models, locations
- Locations | Cost, skills, sustainability, portfolio – plus a tracking tool
- Tracking services | Service providers, locations, risk
- Other | Market intelligence, service provider capabilities, technologies, contract assessment

Table of contents (page 1 of 2)

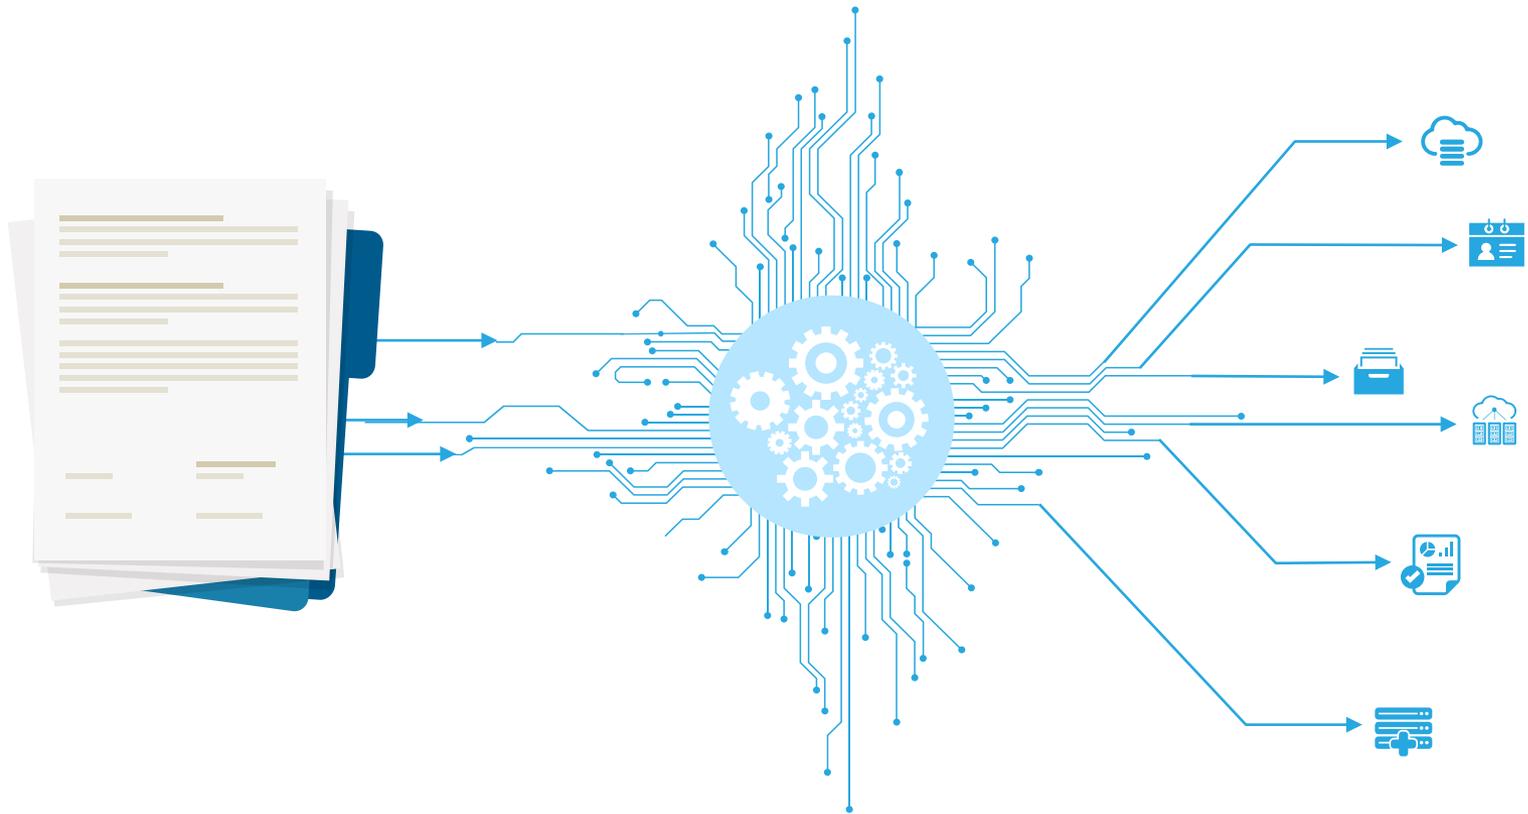

| Topic | Page no. |
|--|-----------|
| Objective of the Playbook | 5 |
| Section I: Introduction to automation | 6 |
| • Evolution of automation | 7 |
| • Robotic Desktop Automation (RDA) | 8 |
| • Robotic Process Automation (RPA) | 9 |
| • Intelligent automation | 11 |
| • Key components of intelligent automation | 13 |
| Section II: What is IDP and why is it important? | 15 |
| • Understanding enterprise grade IDP solutions | 16 |
| • OCR vs. IDP | 17 |
| • Key benefits of IDP software solutions | 18 |
| • Key core technologies powering IDP capabilities | 19 |
| Section III: IDP market characteristics | 20 |
| Section IV: The IDP Journey | 27 |
| • Understand current state and market capabilities | 29 |
| • Building a business case – what is the right outcome target state? | 34 |
| • Determining the capabilities required to achieve identified outcomes | 46 |
| • Identify all determinants and map path | 52 |
| • Execute against mapped path | 61 |

Table of contents (page 2 of 2)

| Topic | Page no. |
|--|-----------|
| Section VI: Challenges and best practices | 75 |
| • Challenges | 76 |
| • Best practices | 77 |
| – Talent management | 78 |
| – Change management | 80 |
| – Preparedness and performance monitoring | 82 |
| – Governance and expectations alignment | 83 |
| – Data availability | 84 |
| – Role of CoE | 85 |
| • Case study 1 | 86 |
| • Case study 2 | 87 |
| Section VI: Future outlook | 88 |
| Appendix | 90 |
| • Enterprise IDP capability maturity model | 91 |
| • Environmental determinants | 103 |
| • Variance in execution path steps for organizations by environmental determinants | 104 |
| • Glossary of terms | 108 |
| • Research calendar | 110 |
| • References | 111 |

Objective

The aim of the IDP Playbook is to empower enterprises at various stages of their digital journeys with insights on the role and impact of IDP in digital journeys and to help develop strategies to improve outcomes from their IDP investments.

Overview and abbreviated summary of key messages (page 1 of 2)

Adoption of IDP solutions can not only help enterprises achieve cost savings, but also improve their workforce productivity as well as employee and customer experience. Using a five-step approach to adopt, expand and scale the IDP solutions, this playbook taps various frameworks, and Capability Maturity Models (CMM), to empower enterprises to conceptualize where they want to get with automating data capture, create a business case for adoption, what capabilities they need to develop to get there, and to plot the path for their journeys. The Playbook also highlights IDP market characteristics, challenges & best practices for adoption, enterprise case studies, and future outlook.

Some of the findings in this report are:

Introduction to automation

- The automation ecosystem is evolving from basic automation for transactional tasks toward intelligent automation that can impact even judgment-intensive processes
- Intelligent automation overcomes the limitations of RPA and RDA by complementing them with AI-based technologies to enable end-to-end automation
- AI-based solutions such as IDP and IVA process semi-structured and unstructured data to complement RPA and RDA

What is IDP and why is it important?

- IDP software solutions blend the power of AI technologies to efficiently process all types of documents and feed the output into downstream applications
- IDP solutions are capable of processing documents with greater accuracy and are more resilient to changes in document templates than traditional OCR
- Some of the key benefits of IDP software solutions include cost savings, increased productivity & efficiency of digital & non-digital workforce, improved employee experience, improved accuracy, and faster turn-around time due to Straight Through Processing (STP)
- OCR, Computer Vision, ML & DL models, and NLP are the key core technologies powering IDP capabilities

The IDP journey

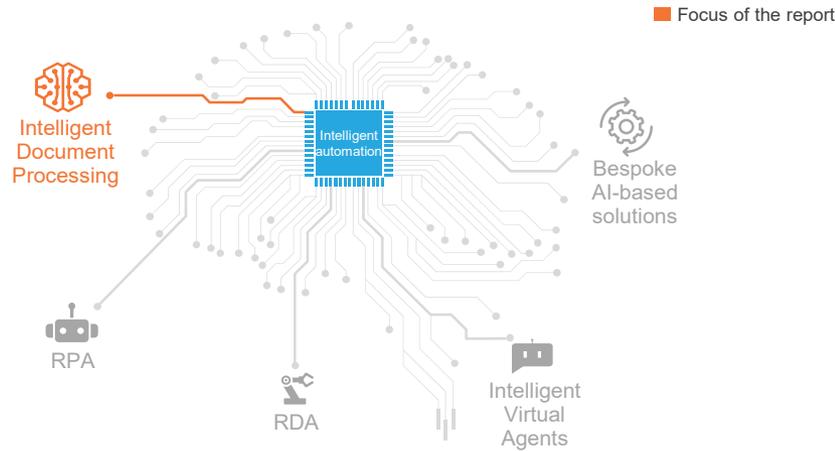

- Enterprises can break down their IDP journeys into five distinct steps
 - **Understand current state and market capabilities:** Use Everest Group Pinnacle Model™ framework to understand and measure the current and target states of IDP journey within your business operations. This should be done in terms of capabilities and desired outcomes
 - **Create a business case and refine target state, if required:** Build a business case for adoption of IDP solution by leveraging outlined framework
 - **Determine capability target state:** Use the Capability Maturity Models (CMM) provided in the playbook to work out the gap between your current and the desired end state, and what you need to do in order to achieve it
 - **Identify all determinants and map path:** Map your journey taking into account the organization's culture as well as the business needs to develop a realistic journey plan and to plot the path to your target state. Use journey option examples in the playbook to finalize the path
 - **Execute against mapped path:** The first step in execution is to identify & prioritize the process using given framework. Next step is to select the right IDP solution/partner by assessing IDP vendor on various parameters

Challenges and best practices

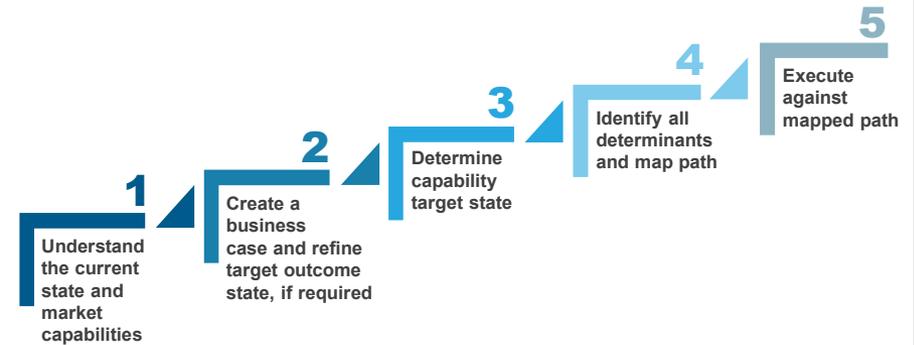

- Availability of training data, internal resistance, lack of understanding of IDP solutions, expectations mismatch, and difficulty in estimating total benefits are some of the key challenges that enterprises face in their journey
- Best practices around Talent management, Change management, Preparedness and performance monitoring, Governance and expectations alignment, Data availability, and Role of CoE
- Two enterprise case studies

This study offers six chapters providing a deep dive into enterprises' IDP journeys ; below are four charts to illustrate the depth of the report

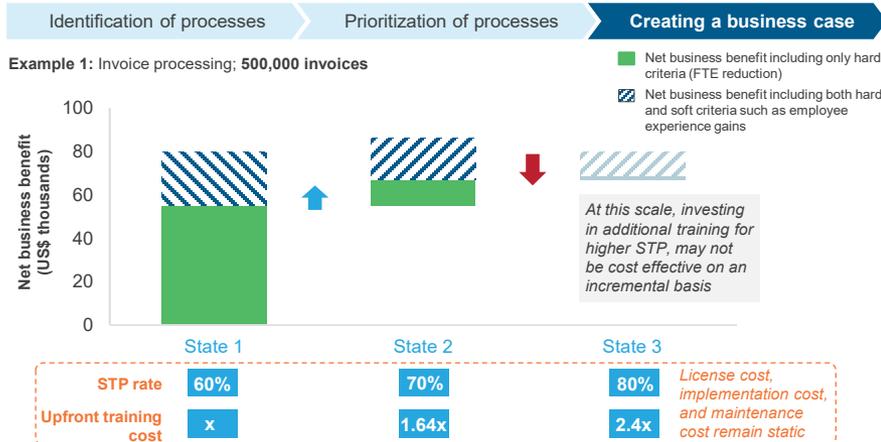

Key components of intelligent automation

Five steps for a successful IDP journey

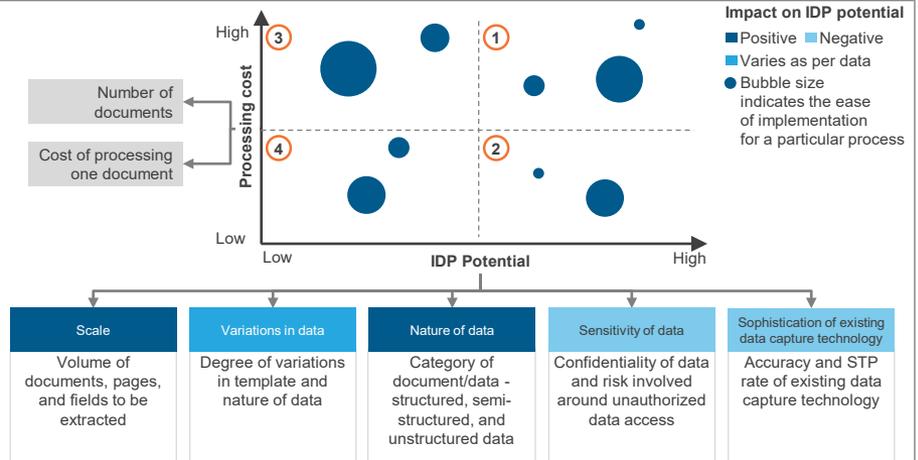

Building a business case for IDP adoption

Framework to identify high priority processes for IDP

Additional SOT research references

The following documents are recommended for additional insight into the topic covered in this report. The recommended documents either provide additional details on the topic or complementary content that may be of interest

- 1. Robotic Process Automation (RPA) – Technology Vendor Landscape with Products PEAK Matrix™ Assessment 2019** ([EGR-2019-38-R-3217](#)); 2019. Robotic Process Automation (RPA) is a key enabler of enterprise automation. This report uses Everest Group's proprietary PEAK Matrix™ to assess and evaluate RPA capabilities of independent software vendors across two key dimensions, market impact and vision & capability. It also includes competitive landscape & market share analysis, Everest Group's remarks on technology vendors highlighting their key strengths & areas of improvement, assessment of vendors' attended RPA / RDA capabilities, and insights into advances in RPA technologies
- 2. Intelligent Document Processing (IDP) – Technology Vendor Landscape with Products PEAK Matrix™ Assessment 2019** ([EGR-2019-38-R-3101](#)); 2019. This report uses Everest Group's proprietary PEAK Matrix™ to assess and evaluate IDP software products of 16 technology vendors across two key dimensions – market impact as well as vision and capability. It also includes IDP competitive landscape, Everest Group's remarks on IDP technology vendors highlighting their key strengths and areas of improvement, and IDP product capability trends and predictions
- 3. Smart RPA Playbook** ([EGR-2018-38-R-2824](#)). Smart RPA, which blends both RPA and AI capabilities, is a core competency that can successfully enable digital transformation for enterprises. Using a five-step approach to adopt, expand, and scale Smart RPA deployments, this Playbook taps various frameworks, such as Everest Group's Pinnacle Model™ and Capability Maturity Model (CMM), to empower enterprises to conceptualize where they want to go with enterprise automation, what capabilities they need to develop to get there, and the ideal path for their journeys

About Everest Group

Everest Group is a consulting and research firm focused on strategic IT, business services, and sourcing. We are trusted advisors to senior executives of leading enterprises, providers, and investors. Our firm helps clients improve operational and financial performance through a hands-on process that supports them in making well-informed decisions that deliver high-impact results and achieve sustained value. Our insight and guidance empower clients to improve organizational efficiency, effectiveness, agility, and responsiveness. What sets Everest Group apart is the integration of deep sourcing knowledge, problem-solving skills and original research. Details and in-depth content are available at www.everestgrp.com.
